

**Government Polytechnic, Malkangiri**  
**Lesson plan: STRUCTURAL MECHANICS**

<b>Discipline:</b> Civil engineering	<b>Semester</b> : 3 <sup>rd</sup>	<b>Name of Teaching faculty:</b> P SANKAR PATRO (PTGF)	
<b>Subject:</b> SM	No. of days/ per week class alloted: 5	<b>Semester from Date:</b> 15/ 09/2022	<b>To Date:</b> 21/01/2023
<b>Week</b>	<b>Class Day</b>	<b>Topics</b>	
		<b>1. Review Of Basic Concepts</b>	
<b>1<sup>st</sup></b>	1 <sup>ST</sup>	<b>1.1</b> Basic Principle of Mechanics: Force, Moment,	
	2 <sup>ND</sup>	support conditions Conditions of equilibrium,	
	3 <sup>RD</sup>	C.G & MI, Free body diagram	
	4 <sup>TH</sup>	<b>1.2</b> Review of CG and MI of different sections	
		<b>2. Simple And Complex Stress, Strain</b>	
	5 <sup>th</sup>	2.1 Simple Stresses and Strains	
<b>2<sup>nd</sup></b>	1 <sup>st</sup>	2.1 Simple Stresses and Strains	
	2 <sup>nd</sup>	2.1 Simple Stresses and Strains	
	3 <sup>rd</sup>	2.1 Simple Stresses and Strains	
	4 <sup>th</sup>	2.1 Simple Stresses and Strains	
	5 <sup>th</sup>	2.2 Application of simple stress and strain in engineering field	
<b>3<sup>rd</sup></b>	1 <sup>st</sup>	2.2 Application of simple stress and strain in engineering field	
	2 <sup>nd</sup>	2.2 Application of simple stress and strain in engineering field	
	3 <sup>rd</sup>	2.2 Application of simple stress and strain in engineering field	
	4 <sup>th</sup>	2.3 Complex stress and strain	
	5 <sup>th</sup>	2.3 Complex stress and strain	
<b>4<sup>th</sup></b>	1 <sup>st</sup>	2.3 Complex stress and strain	
	2 <sup>nd</sup>	2.3 Complex stress and strain	
	3 <sup>rd</sup>	2.3 Complex stress and strain	
	4 <sup>th</sup>	2.3 Complex stress and strain	
		<b>3. Stresses In Beams and Shafts</b>	

	5 <sup>th</sup>	3.1 Stresses in beams due to bending
5 <sup>th</sup>	1 <sup>st</sup>	3.1 Stresses in beams due to bending
	2 <sup>nd</sup>	3.1 Stresses in beams due to bending
	3 <sup>rd</sup>	3.1 Stresses in beams due to bending
	4 <sup>th</sup>	3.1 Stresses in beams due to bending
	5 <sup>th</sup>	3.2 Shear stresses in beams:
6 <sup>th</sup>	1 <sup>st</sup>	3.2 Shear stresses in beams:
	2 <sup>nd</sup>	3.2 Shear stresses in beams:
	3 <sup>rd</sup>	3.3 Stresses in shafts due to torsion
	4 <sup>th</sup>	3.3 Stresses in shafts due to torsion
	<b>4. Columns and Struts</b>	
5 <sup>th</sup>	4.1 Columns and Struts, Definition, Short and Long columns, End conditions,	
7 <sup>th</sup>	1 <sup>st</sup>	Equivalent length / Effective length, Slenderness ratio,
	2 <sup>nd</sup>	Axially loaded short and long column,
	3 <sup>rd</sup>	Euler's theory of long columns, Critical load for Columns with different end conditions
	<b>5. Shear Force and Bending Moment</b>	
	4 <sup>th</sup>	5.1 Types of loads and beams
	5 <sup>th</sup>	5.1 Types of loads and beams
8 <sup>th</sup>	1 <sup>st</sup>	5.2 Shear force and bending moment in beams:
	2 <sup>nd</sup>	5.2 Shear force and bending moment in beams:
	3 <sup>rd</sup>	5.2 Shear force and bending moment in beams:
	4 <sup>th</sup>	5.2 Shear force and bending moment in beams:
	5 <sup>th</sup>	5.2 Shear force and bending moment in beams:
9 <sup>th</sup>	1 <sup>st</sup>	5.2 Shear force and bending moment in beams:
	2 <sup>nd</sup>	5.2 Shear force and bending moment in beams:
	3 <sup>rd</sup>	5.2 Shear force and bending moment in beams:
	4 <sup>th</sup>	5.2 Shear force and bending moment in beams:

	5 <sup>th</sup>	<b>5.2 Shear force and bending moment in beams:</b>
	<b>6. Slope and Deflection</b>	
<b>10<sup>th</sup></b>	1 <sup>st</sup>	Shape and nature of elastic curve (deflection curve); Relationship between slope, deflection and curvature (No derivation), Importance of slope and deflection.
	2 <sup>nd</sup>	Shape and nature of elastic curve (deflection curve); Relationship between slope, deflection and curvature (No derivation), Importance of slope and deflection.
	3 <sup>rd</sup>	Shape and nature of elastic curve (deflection curve); Relationship between slope, deflection and curvature (No derivation), Importance of slope and deflection.
	4 <sup>th</sup>	Shape and nature of elastic curve (deflection curve); Relationship between slope, deflection and curvature (No derivation), Importance of slope and deflection.
	5 <sup>th</sup>	Shape and nature of elastic curve (deflection curve); Relationship between slope, deflection and curvature (No derivation), Importance of slope and deflection.
<b>11<sup>th</sup></b>	1 <sup>st</sup>	Slope and deflection of cantilever and simply supported beams under concentrated and uniformly distributed load (by Double Integration method, Macaulay's method).
	2 <sup>nd</sup>	Slope and deflection of cantilever and simply supported beams under concentrated and uniformly distributed load (by Double Integration method, Macaulay's method).
	3 <sup>rd</sup>	Slope and deflection of cantilever and simply supported beams under concentrated and uniformly distributed load (by Double Integration method, Macaulay's method).
	4 <sup>th</sup>	Slope and deflection of cantilever and simply supported beams under concentrated and uniformly distributed load (by Double Integration method, Macaulay's method).
	5 <sup>th</sup>	Slope and deflection of cantilever and simply supported beams under concentrated and uniformly distributed load (by Double Integration method, Macaulay's method).
	<b>7. Indeterminate Beams</b>	
<b>12<sup>th</sup></b>	1 <sup>st</sup>	7.1 Indeterminacy in beams, Principle of consistent deformation/compatibility,

	2 <sup>nd</sup>	7.1 Indeterminacy in beams, Principle of consistent deformation/compatibility,
	3 <sup>rd</sup>	7.1 Indeterminacy in beams, Principle of consistent deformation/compatibility,
	4 <sup>th</sup>	Analysis of propped cantilever, fixed and two span continuous beams by principle of superposition,
	5 <sup>th</sup>	Analysis of propped cantilever, fixed and two span continuous beams by principle of superposition,
<b>13<sup>th</sup></b>	1 <sup>st</sup>	Analysis of propped cantilever, fixed and two span continuous beams by principle of superposition,
	2 <sup>nd</sup>	Analysis of propped cantilever, fixed and two span continuous beams by principle of superposition,
	3 <sup>rd</sup>	Analysis of propped cantilever, fixed and two span continuous beams by principle of superposition,
	4 <sup>th</sup>	SF and BM diagrams (point load and udl covering full span)
	5 <sup>th</sup>	SF and BM diagrams (point load and udl covering full span)
	<b>8. Trusses</b>	
<b>14<sup>th</sup></b>	1 <sup>st</sup>	8.1 Introduction: Types of trusses
	2 <sup>nd</sup>	Types of trusses
	3 <sup>rd</sup>	statically determinate and indeterminate trusses
	4 <sup>th</sup>	statically determinate and indeterminate trusses
	5 <sup>th</sup>	degree of indeterminacy
<b>15<sup>th</sup></b>	1 <sup>st</sup>	degree of indeterminacy
	2 <sup>nd</sup>	stable and unstable trusses
	3 <sup>rd</sup>	stable and unstable trusses
	4 <sup>th</sup>	stable and unstable trusses
	5 <sup>th</sup>	stable and unstable trusses
